Sample IT and Security Policy

1. Laptop Policy

Every new employee receives a company laptop on the first day of joining. The laptop must be returned to the IT department on the last working day. If the laptop is lost or damaged, the employee must inform the IT team within 24 hours.

2. Password Policy

Passwords must be at least 12 characters long and must include letters, numbers and symbols. Passwords must be changed every 90 days. Sharing passwords with anyone, including colleagues, is strictly not allowed.

3. Internet and Email Usage

Company internet and email are meant for official work. Social media and streaming websites are blocked during office hours from 10 AM to 6 PM. Employees must not open attachments from unknown senders.

4. Remote Access (VPN)

Employees working from home must connect through the company VPN. VPN access is provided after approval from the reporting manager. Public Wi-Fi must not be used for office work without VPN.

5. Data Backup

All official files must be saved on the company cloud drive. Local backups are taken every Friday at 5 PM. Employees must not store confidential files on personal pen drives or personal email.

6. IT Support

For any technical issue, employees can raise a ticket on the IT helpdesk portal or email it-support@example.com. The IT team responds within 4 working hours.
